Dan Katz, Inside HPC

"About half the papers in recent issues of Science discuss findings that were made using software-intensive projects. . ."

S.J. Hettrick et al, UK Research Software Survey 2014

"7 out of 10 researchers say that research would not be possible without software."

Ian Holmes
@ianholmes

You can download our code from the URL supplied. Good luck downloading the only postdoc who can get it to run, though #overlyhonestmethods

## SSI

Our mission is to cultivate better, more sustainable, research software to enable world-class research.

- Getting software on the research agenda
- Supporting communities that want change
- Increasing skills
- Improving software
